

GlutenTox Sticks

Test ingredients, finished products and surfaces for gluten contamination with GlutenTox Sticks

For facilities that produce both “traditional” and gluten-free items, ensuring that the manufacturing ingredients and environment are free from traces of gluten is a top concern. Accordingly, **GlutenTox Sticks** are designed to detect gluten in even the most complex matrices. Each kit includes supplies to conduct **25 tests**.

GlutenTox Sticks are:

- ◆ **Accurate:** G12 antibody detects gluten from all toxic grains; no false positives
- ◆ **Flexible:** Adjustable sensitivity; you can set LOD anywhere from 3ppm to 100+ppm
- ◆ **Semi-quantitative results** in less than an hour
- ◆ **Suitable for even complex matrices:** optional additive for samples high in polyphenols, tannins, and antioxidants
- ◆ **Reliable:** Shelf-stable and long-lasting
- ◆ **Cost efficient:** Competitive pricing and volume discounts available

Designed for manufacturers with access to basic lab equipment, GlutenTox Sticks provides a fine degree of control and **semi-quantitative analysis** of gluten contamination in foods and liquids. **Quantify results** with the GlutenTox Reader, a simple device providing a precise PPM count in seconds.
